Murray Serial Number

The value of the mower is also indicative of when it was produced The date, however, is not clearly displayed but is represented by a date code.. For example, if the date code is 4156, the mower was produced in 2004, on the 156th day of the year.. The year the mower was manufactured is represented as the first digit, and the day of the year it was produced is represented by the last three digits.. To order new parts, you must have some identifying information about the mower such as the date code, which will separate the same model mowers that were produced over several years.. Kingston holds a Bachelor of Arts in English from Mills College. These tags are found in the rear of the mower or under the seat of riding lawn mowers, or in the center of the deck of push mowers.. If the model number has a dash, the date code, for example, will indicate 1994 rather than 2004.

If you are unsure if your mower is that old, go to the next step Post-2001 models have a five- or six-digit model number with no dash.
